Exclusive SPEED KEEPER Hook Keeper

Innovative Line Recognition Speed Dial

Your Speed Spool® reel features a convenient line indicator dial on the spool's tension knob. Quickly recognize what line type and line weight you have loaded on your reel.

FEATURES:

- Exclusive Speed Keeper Hook Keeper (pat. pend.)
- One-piece diecast aluminum frame
- Drilled and forged, anodized aluminum 16 hole U-spool
- Lightweight C40 carbon left and right sideplates
- SpeedCast[®] externally adjustable Centrifugal Brake System
- Rugged carbon composite drag system provides up to 14 lbs. of drag power
- Ti coated zirconia line guide
- 95MM bowed carbon handle with duracork/EVA paddle shaped knobs
- External lube port

Performance – Right out of the Box!

Our new Speed Spool LFS baitcast reel by Lew's® is designed for performance and functionality. From the way it conforms to your hand, to the way it reacts crisply and effortlessly to your command, you'll know the minute you grab onto the Speed Spool® that you've got a quality reel.

Your Speed Spool® reel exploits several new developments which will allow you to set yourself apart from the competition.

High Strength Aluminum Gearing

The drive gear, crankshaft, and worm shaft are made of high strength aluminum for increased strength and durability. In addition to these advantages, aluminum provides exceptionally low friction to enhance efficiency.

One-piece Die Cast Aluminum Frame

Your Speed Spool® reel utilizes a one-piece all aluminum frame. So you'll never have to worry about frame twisting or torquing.

Lightweight Machined Aluminum Spool

The spool on your Lew's® reel has been engineered to maximize casting distance. Anodized to withstand oxidation and abrasion, machined and built for deep capacity,

Zero-Reverse Anti-Reverse Bearing

Machined Aluminum Spool

The handle on your Speed Spool® reel will only rotate forward for rock solid hook setting. When you release the handle it will hold its position because of Anti-Reverse bearings, never losing an inch on your catch; an invaluable property to have when you're pulling it in.

Externally Adjustable Centrifugal Brake System

The SpeedCast[®] Adjustable Centrifugal Brake System delivers an extreme range of braking power from free spool to maximum by simply clicking its external dial to choose among 27 variable settings. The Tournament Pro Speed Spool puts you in control of your casts, perfectly aligning brake power to lure size. With this system you will have more casting control over light lures, while maximizing casting distance with all lures.

Cast Control System/Speed Dial

A second feature exits to prevent backlash, the Cast Control System. An adjustment knob is found next to the star drag. The function saddles the spool shaft with steady pressure in order to stabilize spool speed.

To calibrate the system reel your lure in until it rests on the tip of the rod, then tighten the knob until taut. Depress the thumb bar, and holding the rod horizontally loosen the knob slowly until the lure begins to descend. The spool should continue to spin after the lure contacts the ground, but should not complete more than one full rotation. If the spool does not continue to spin, the knob is to tight. If the spool completes more than one rotation, the knob is to loose, Repeat until you have achieved the desired results.

To set your Speed Dial, simply insert thumbnail or small coin in slot located in the center of the Speed Dial and turn the arrow marked M/B(mono or braid) of F (fluorocarbon) to the desired line rating number.

Bowed 95MM Carbon Fiber Handle

Our 95mm bowed carbon fiber handle will give you all the cranking power you need. The Lew's® custom paddle handle knobs are an added bonus and will provide comfortable fit and ease for all day fishing.

One Year Limited Warranty

Maintenance and Care

To remove the palming side plate, rotate palming side plate up while pulling the plunger located on the gear side-plate out.

When applying lubricant to your Speed Spool® reel, avoid using multi-purpose oil. Use lightweight oils or greases made for fishing reels. Apply oil to all bearings, the crank shaft, and the worm gear. Apply grease to the bushings, pinion gears, drive gears, and crank gears.

After usage your reel should be inspected for dirt or sand and cleaned if excessive buildup is present If your reel has come in contact with saltwater it is important to flush all parts with water, dry and re-lubricate your reel. Through diligent cleaning and maintenance your Lew's® reel will provide you with years of realiability and sound performance
