FEATURES:
- One-piece, lightweight graphite frame and sideplates
- Premium double-shielded, stainless steel 10-bearing system
- Stainless steel Zero-Reverse one-way clutch bearing
- Multi-Setting Brake (MSB) utilizing both an external click dial to adjust the Magnetic Brake System, and an internal 4-pin positive on/off Centrifugal Brake System
- Forged double-anodized aluminum U-shape spool
- Rulon drag system provides up to 10lbs. of drag power
- Zirconia line guide
- Bowed aluminum handle with Lew’s®custom SoftTouch paddle handle knob

Performance – Right out of the Box!

Your Speed Spool® reel by Lew’s® is designed for performance and functionality. From the way it conforms to your hand, to the way it reacts crisply and effortlessly to your command, you’ll know the minute you grab onto the Speed Spool® that you’ve got a quality reel. Your Speed Spool® reel exploits several new developments which will allow you to set yourself apart from the competition.

High Strength Brass Gearing
The drive gear, crankshaft, and worm shaft are made of high strength brass for increased strength and durability. In addition to these advantages, brass provides exceptionally low friction to enhance efficiency.

Lightweight Graphite Frame
The one-piece graphite frame design makes this reel lightweight, yet still very strong.

Lightweight Machined Aluminum Spool
The spool on your Lew’s® reel has been engineered to maximize casting distance. Anodized to withstand oxidation and abrasion, machined and built for deep capacity.

Anti-Reverse Bearing
The handle on your Speed Spool® reel will only rotate forward for rock solid hook setting. When you release the handle it will hold its position because of Anti-Reverse bearings, never losing an inch on your catch; an invaluable property to have when you’re pulling it in.

Multi-setting Braking System
In order to combat backlash after a cast your Speed Spool reel is furnished with both a centrifugal brake system and an externally adjustable magnetic brake system. As the spool accelerates it experiences magnetic resistance as well as friction by four internal brake shoes which slide outwards when engaged. You can control the magnetic brake with a dial on the palming side-plate. To disengage individual brake shoes remove the palming side-plate. The four brake shoes are housed within a disk attached to the spool assembly. When disengaged the brake shoes remain stationary when the spool spins and do not inflict friction on the spool.

Cast Control System
A second feature exits to prevent backlash, the Cast Control System. An adjustment knob is found next to the star drag. The function saddles the spool shaft with steady pressure in order to stabilize spool speed.

To calibrate the system reel your lure in until it rests on the tip of the rod, then tighten the knob until taut. Depress the thumb bar, and holding the rod horizontally loosen the knob slowly until the lure begins to descend. The spool should continue to spin after the lure contacts the ground, but should not complete more than one full rotation. If the spool does not continue to spin, the knob is too tight. If the spool completes more than one rotation, the knob is too loose. Repeat until you have achieved the desired results.
Lew’s® Warrants its products to withstand normal use for the purpose designed and intended when manufactured for a period of one (1) year from the original retail date to the original retail consumer. Lew’s® will repair or replace any part of a Lew’s® product that proves to be defective in material or workmanship. Unless covered by this warranty, Lew’s® will repair or replace any part of a Lew’s® product that proves to be defective in material or workmanship. All parts covered by this warranty must be returned to an authorized Lew’s® dealer or authorized repair facility at the owner’s expense. This warranty does not cover labor or any other costs incurred in the repair or replacement of a Lew’s® product. This warranty is only available to the original retail consumer and is non-transferable.

Leakage of the product due to normal wear and tear is not covered by this warranty. Normal wear and tear includes such items as belts, brushes, and other moving parts that require periodic replacement. Normal wear and tear also includes the wear and tear that occurs during normal use of the product. Normal wear and tear is not covered by this warranty because it is not a defect in material or workmanship.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. If you have any questions about this warranty or the repair of a Lew’s® product, please contact your local authorized Lew’s® dealer or the Lew’s® Customer Service Department at 1-888-4Lew’s for assistance.

Performance – Right out of the Box!

Your Tournament Laser® MG Speed Spool® reel by Lew’s® is designed for performance and functionality. From the way it conforms to your hand, to the way it reacts crisply and effortlessly to your command, you’ll know the minute you grab onto the Speed Spool® that you’ve got a quality reel.

Your Speed Spool® reel exploits several new developments which will allow you to set yourself apart from the competition.

High Strength Brass Gearing

The drive gear, crankshaft, and worm shaft are made of high strength brass for increased strength and durability. In addition to these advantages, brass provides exceptionally low friction to enhance efficiency.

Lightweight Graphite Frame

The one-piece graphite frame design makes this reel lightweight, yet still very strong.

Lightweight Machined Aluminum Spool

The spool on your Lew’s reel has been engineered to maximize casting distance. Anodized to withstand oxidation and abrasion, machined and built for deep capacity.

Anti-reverse Bearing

The handle on your Speed Spool® reel will only rotate forward for rock solid hook setting power. When you release the handle it will hold its position because of anti-reverse bearings, never losing an inch on your catch; an invaluable property to have when you’re pulling it in.

Multi-setting Braking System

In order to combat backlash after a cast your Speed Spool® reel is furnished with both a centrifugal brake system and an externally adjustable magnetic brake system. As the spool accelerates it experiences magnetic resistance as well as friction by four internal brake shoes which slide outwards when engaged. You can control the magnetic brake with a dial on the palming side-plate. To disengage individual brake shoes remove the palming side-plate. The four brake shoes are housed within a disk attached to the spool assembly. When disengaged the brake shoes remain stationary when the spool spins and do not inflict friction on the spool.

Cast Control System

A second feature exists to prevent backlash, the Cast Control System. An adjustment knob is found next to the star drag. The function saddles the spool shaft with steady pressure in order to stabilize spool speed.

To calibrate the system reel your lure in until it rests on the tip of the rod, then tighten the knob until taut. Depress the thumb bar, and holding the rod horizontally loosen the knob slowly until the lure begins to descend. The spool should continue to spin after the lure contacts the ground, but should not complete more than one full rotation. If the spool does not continue to spin, the knob is too tight. If the spool completes more than one rotation, the knob is too loose. Repeat until you have achieved the desired results.

---
Lew's® warrants its products to withstand normal use for the purpose designed and intended when manufactured for a period of one (1) year from the original retail sale date to the original retail consumer. Lew's® will repair or replace® Lew's® products which require for the warranty period and return® the product to the owner at no additional® cost to the owner.

Numerous products have been manufactured under variations of the Lew's® name and under the Lew's® logo by multiple businesses over the past 50 years. This warranty is in force on behalf of Lew's® of Springfield, Missouri USA since January 1, 2010. Lew's® products manufactured by or on behalf of other entities prior to January 1, 2010 are not covered by this warranty. In all circumstances, this warranty is limited in value to the original retail value of the product and is limited to actual damage to the Lew's® product (less any reasonable amount of wear and tear) due to the attempted repair or servicing of a Lew's® product by any person or business other than Lew's® or Lew's Authorized Warranty Service Agent, and damage caused by or resulting from abuse, misuse, lack of recommended maintenance, acts of God, or any other cause or event occurring subsequent to receipt by Lew's® or Lew's Authorized Agent from the consumer of the product. Any products replaced by Lew's® will not be new or remanufactured by a Lew's Authorized Agent with the same or next model upgrade product. Lew's® will not return warranted products to the consumer by reasonable means as determined by Lew's®. Express or expedited services are the responsibility of the consumer as is sending the product to Lew's® or Lew's Authorized Agent, for Warranty Service. Lew's® and Lew's Service Agents as authorized by Lew's® are the sole agents authorized to repair or replace® Lew's® products under the terms of this warranty. Only written changes by an officer of Lew's® can alter the terms or conditions of this warranty.

This warranty gives you specific legal rights including additional rights extended by some states which do not allow certain exclusions and limitations. Any action brought against Lew's® for the purpose of settling a warranty dispute shall be brought and litigated in the State of Missouri, County of Greene.
