Performance – Right out of the Box!

Your new Speed Spool® SLP baitcast reel by Lew’s® is designed for performance and functionality. From the way it conforms to your hand, to the way it reacts crisply and effortlessly to your command, you’ll know the minute you grab onto the Speed Spool® SLP that you’ve got a quality reel.

Your Speed Spool® SLP reel exploits several new developments which will allow you to set yourself apart from the competition.

High Strength Aluminum Gearing
The drive gear, crankshaft, and worm shaft are made of high strength aluminum for increased strength and durability. In addition to these advantages, aluminum provides exceptionally low friction to enhance efficiency.

One-piece Aluminum Frame
Your Speed Spool® reel utilizes a one-piece all aluminum frame. So you’ll never have to worry about frame twisting or torqueing.

Innovative Line Recognition Speed Dial
Your Speed Spool® reel features a convenient line indicator dial on the spool’s tension knob. Quickly recognize what line type and line weight you have loaded on your reel.

Lightweight Machined Aluminum Spool
The spool on your Lew’s® reel has been engineered to maximize casting distance. Double anodized to withstand oxidation and abrasion, machined and built for deep capacity.

Anti-Reverse Bearing
The handle on your Speed Spool® reel will only rotate forward for rock solid hook setting. When you release the handle it will hold its position because of Anti-Reverse bearings, never losing an inch on your catch; an invaluable property to have when you’re pulling it in.

Multi-Setting Braking System (MSB)
In order to combat backlash after a cast your Speed Spool reel is furnished with both a centrifugal brake system and an externally adjustable magnetic brake system. As the spool accelerates it experiences magnetic resistance as well as friction by four internal brake shoes which slide outwards when engaged. You can control the magnetic brake with a dial on the palming side-plate. To disengage individual brake shoes remove the palming side-plate. The four brake shoes are housed within a disk attached to the spool assembly. When disengaged the brake shoes remain stationary when the spool spins and do not inflict friction on the spool.

Cast Control System
A second feature exits to prevent backlash, the Cast Control System. An adjustment knob is found next to the star drag. The function saddles the spool shaft with steady pressure in order to stabilize spool speed.

To calibrate the system reel your lure in until it rests on the tip of the rod, then tighten the knob until taut. Depress the thumb bar, and holding the rod horizontally loosen the knob slowly until the lure begins to descend. The spool should continue to spin after the lure contacts the ground, but should not complete more than one full rotation. If the spool does not continue to spin, the knob is too tight. If the spool completes more than one rotation, the knob is too loose. Repeat until you have achieved the desired results.

Bowed 95MM Aluminum Handle
Our 95mm bowed aluminum handle will give you all the cranking power you need.

Exclusive Speed Keeper Hook Keeper

**FEATURES:**
- Exclusive Speed Keeper Hook Keeper (pat. pend.)
- 10-bearings system with stainless steel double shielded ball bearings and Zero-Reverse one-way clutch bearing
- One-piece aluminum frame
- Speed Dial provides quick and easy line recognition
- Machined and double anodized Aluminum U-spool
- Multi-Setting Brake (MSB) dual cast control system
- Rugged carbon fiber drag system - provides up to 14 lbs. of drag power
- Zirconia line guide
- External lube port
Lew's® Warrants its products to withstand normal use for the purpose designed and intended when manufactured for a period of one (1) year from the original retail sale date to the original retail consumer. Lew's® will at its option repair or replace Lew's® products when required for the warranty period and return the product to the owner at no additional cost to the owner.

Numerous products have been manufactured under variations of the Lew's® name and under the Lew's® Logo by multiple businesses over the past 50 years. This warranty is specifically for products manufactured on behalf of Lew's® of Springfield, Missouri USA since January 1, 2010. Lew's® products manufactured by or on behalf of other entities prior to January 1, 2010 are not covered by this warranty. In all circumstances, this Warranty is Limited in Value to the original retail value of the product and is limited to actual damages to the product alone. Lew's® products purchased in transit to Lew's® or Lew's® Authorized Agent are outside the scope of Lew's® Limited Warranty and will be repaired through Lew's® after warranty services at the expense of the consumer. Any products replaced by Lew's® will be new or re-manufactured by a Lew's® Authorized Agent with the same or next model upgrade product. Lew's® will not re-manufacture products to the consumer by reasonable means as determined by Lew's®. Express or expedited services are the responsibility of the consumer as is sending the product to Lew's® or Lew's® Authorized Agent, for Warranty Service. Lew's® and Lew's® Service Agents as authorized by Lew's® are the sole agents authorized to repair or replace Lew's® products under the terms of this warranty. Only written changes by an officer of Lew's® can alter the terms or conditions of this warranty.

This warranty gives you specific legal rights including additional rights extended by some states which do not allow certain exclusions and limitations. Any action brought against Lew's® for the purpose of settling a warranty dispute shall be brought and litigated in the State of Missouri, County of Greene.

One Year Limited Warranty

LEW'S® TURNOVER SPEED SPOOL® SLP TSLP15H

When applying lubricant to your Speed Spool® reel, avoid using multipurpose oil. Use lightweight oils or greases made for fishing reels. Apply oil to all bearings, the crankshaft and the worm gear. Apply grease to the bushings, pinion gears, drive gears, and crank gears.

After usage, your reel should be inspected for dirt or sand and cleaned if excessive build-up is present. If your reel has been in contact with saltwater it is important to flush all parts with water, dry and re-lubricate your reel. Through diligent cleaning and maintenance your Lew's® reel will provide you with years of reliability and sound performance.
**Performance – Right out of the Box!**
